We will kick off the new school year with the annual Clark County Fall Educator Training where you will build a foundation for sustainability with your Green Team.

During this training you will develop an action plan for your Green Team, explore opportunities and resources, and connect with a growing community of local Green Team Leaders & Partners.

A total of up to 5 free STEM Clock Hours will be provided courtesy of EarthGen. These hours will be given for 2 hours during the live training and 3 hours of optional project implementation work.
